Dear Sir,

This is to confirm your reception of CJAD 800 Khz, on February 26,1995 between the hours of 20:05 and 20:12.

CJAD operates a transmitter site located in St. Edouard, Quebec, Canada at a Daytime power of 50 Kw and a nighttime power of 10 Kw. At the time of your reception we were operating at 10 Kw and our nighttime pattern. The directional patterns were designed to provide protections to other stations operating at 800 Khz in Belleville, Ontario and Quebec City, Quebec.

As for your question about 900 Khz, yes CJAD uses CKTS in Sherbrooke, Quebec as a repeater for all of our programming. Thanks for your interest in Radio.

Please accept my apologies for the late return of your QSL.

Yours Truly,

Mark Kavanagh
Director of Engineering
CJAD, Montreal.
